1. Claims 23-25, 27, 29, 31, 34-35, 40-41, and 64-65 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claims 23-25, 27, 29, 31, 34-35, 40-41, and 64-65 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claims 1-21 of patent 5,566,486 is directed to the a firearm monitoring device in combination with a firearm (see claims 1 and 14). Claims 23-25, 27, 29, 31, 34-35, 40-41, and 64-65 as now presented are directed to a monitoring device or firearm monitoring device independent of a firearm. As such these claims are directed to the subcombination Bsp (see claims 23, 27, and 29) when the claims as originally presented (claims 1-21 of patent 5,566,486) are directed to the combination ABbr (see claims 1 or 14 of patent 5,566,486).

Since applicant has received an action on the merits for the originally presented invention during the prosecution of U.S. Patent application 08/273,648, this invention has been constructively elected by original presentation for prosecution on the merits.

Accordingly, claims 23-25, 27, 29, 31, 34-35, 40-41, and 64-65 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

2. Claims 22 and 63 link(s) inventions I (combination of firearm and monitoring device) and II (monitoring device). The restriction requirement between the linked inventions is **subject to** the nonallowance of the linking claim(s), claims 22 and 63. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions **shall** be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the

allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104 **Claims that require all the limitations of an allowable linking claim** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, the allowable linking claim, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claims 26 and 66 directed to the invention elected by original presentation will be examined in conjunction with claims 22 and 63 directed to claims linking inventions I and II.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

 - e) in combination with a firearm. col. 1, lines 5-10
